

# Data, Analytics & Machine learning

## **Data & Analytics Lead**

Data is key into shaping the future of travel, how we are able to make better decisions from data is more relevant than ever. Be part of delivering value from data to consumers and customers in the largest leisure, travel and tourism company in the world.

Within TUI Nordic we believe that this is not an easy task and there is no silver bullet. To build data pipelines and data lakes supporting both Analytics and Machine learning we need the right people with the right skill set. For this reason, are we looking for a Data & Analytics Lead with strong experience from Data Engineering and Analytics but also with a background working with Machine Learning and Data Science.

The ideal candidate is passionate about shaping the Future of Travel and deliver this through Data, Analytics & Machine learning.

The ability to thrive in a dynamic, fast-paced environment delivering against tight deadlines to create business value from an agile approach. Always keeping in mind that we are building a data foundation to support the Future of Travel.

### **What you'll do**

- Design, implement and deliver our data foundation with data pipelines and data lake
- Ensure the data foundation can be used by analysts, data scientists and automation engineer.
- Enable data flows that support both historical data but also implement support for real-time recommendations
- Personal responsibility for data engineers and data scientists

### **Who you are**

- 3+ years of work experience with Data & Analytics
- Experience working with code first workflows (e.g. Airflow, Beam, Luigi etc.)
- Experience working with data lakes or data warehouses (e.g. Snowflake, BigQuery, Redshift etc.)
- Experience working with visualization tools (Tableau, Shiny, Jupyter)
- Experience working with machine learning
- Ability to work independently
- Ability to work within a DevOps culture
- Ability to work directly with process owners and operations personnel
